

CDI is proud to present the DPA II Interactive Whiteboard: a digital electronic whiteboard that turns a computer and projector into a powerful, interactive teaching tool.

DPA II

The DPA II is an advanced digital interactive whiteboard that creates a large interactive projection screen when connected to a PC and data projector.

How does it work?

A digital projector displays the contents of the computer onto the virtual whiteboard in full stunning color. Using the electronic pen, the teacher is able to manipulate and annotate the images directly on the board. Teachers can change lessons, play animations, make notes and create interactive demonstrations all while remaining in front of the class.

Features

- **FREE WEB-BASED INSTRUCTOR-LED TRAINING**
- 14 predefined Icons with dynamic Presentation Tools and functions
- Virtual WhiteBoard (VWB) to capture and retrieve written ideas in color
- Multimedia Pen with choice of disposable battery size
- Flexible electronics featuring both onboard USB and RS-232 connectivity
- Software upgrades for advanced users and power presenters
- **10-year warranty with product registration (USA)**

Benefits

- Annotate over computer-generated images and capture them for future use
- Only pay for the software features you actually use. Upgrade whenever you are ready for more advanced features
- Take advantage of the "Classroom Tough" surface material designed to take daily abuse without damage
- **Enjoy a low product-acquisition cost and great 10-year warranty**

Specifications

DPA II Carton Contents

- DPA II
- Multimedia Pen with (1) AAA
- Disposable battery
- Fast Start Installation Card
- Installation and Driver CD Rom
- Adjustable Wall Mount Brackets
- Pen holder
- Software Suite

Mobile Stand

With a Mobile Stand you gain the ability to deploy the whiteboard in any classroom you like, whenever you like. The light, sturdy stand is specifically designed for the DPA II and eliminates permanent wall mounts.

\$340

Intelli-Mount

The Numonics Intelli-Mount is a revolutionary new mounting system that gives schools increased flexibility. Unlike standard wall mounts, the Intelli-Mount utilizes an over-the-chalkboard design enabling teachers to give their students all of the proven benefits of interactive whiteboards, without damaging existing blackboards or whiteboards.

DPA II + 3M Short throw projector

This bundle includes the DPA II and the 3M Short Throw Projector for the easiest, most flexible electronic whiteboard solution possible.

It is designed to be simple and cost effective with the flexibility to buy a projection system and additional modules that offer the functionality you need to best fit your environment and your budget. 3M Super Close Projection Systems bring all the right components together in the modular design, to make the presentation display a total standout solution.

Features

- 60" - 80" Telescoping arm with wall mount
- Digital Zoom: 100% to 200%
- Throw Ratio: 0.62
- Lamp Life: 2000 hours (normal), 3000 hours (eco)
- Folding wall mount options provide added safety
- XGA (1024x768) Resoluton
- 2000 lumens (maximum rating)
